## EDUCATION

**Mae Fah Luang University | 2021– present**

Bachelor of Science in Software Engineering

## SUMMARY

Enthusiastic and results-driven final-year Software Engineering student at Mae Fah Luang University with proven expertise in the MERN stack. I have a demonstrated ability to design and implement full-stack web applications, evidenced by key projects including a comprehensive e-learning platform and a real-time task manager. Seeking a challenging Software Engineering Internship to leverage my skills in Node.js and React and contribute to a fast-paced development team.

## TECH SKILL

**React, Next.js, JavaScript, TypeScript, Tailwind, Node.js, Express, Redis, MongoDB, PostgreSQL, MySQL, Jest**

## FEATURED PROJECTS

**Doi Tung – E learning and management**

- Developed MERN stack e-learning platforms with interactive, user-friendly interfaces. Implemented role-based access, where Superadmins have dashboards with analytics charts, user management, and account creation for Users and Admins. Built core features like course creation, quizzes, and multimedia delivery, ensuring efficient, maintainable, and high-performance web applications.

**AI-Powered Interview Preparation**

- Developed an AI-powered interview prep web app using the MERN stack, enabling personalized Q&A based on job role and experience. Implemented JWT authentication, AI-driven explanations, question pinning, and persistent MongoDB storage. Designed a modern, responsive UI with Tailwind CSS for a clean, mobile-friendly learning experience.

**Task Management**

- Developed a smart task management platform using the MERN stack with separate Admin and User portals. Implemented role-based access, allowing Admins to create, assign, and manage tasks, and view interactive analytics charts. Users can track tasks, update status, and visualize progress with real-time sync. Designed a responsive, mobile-friendly UI with Tailwind CSS for an efficient, organized workflow.

## CERTIFICATES

- Full-Stack Web Development at CodeHub MM
- Full-Stack Web Development By Phone Nyo

**Expected Salary – 300 THB per day (Negotiable)**
